

## Crestline® Altra Series Dampener

The Crestline® Altra Series delivers instant ink and water balance without waiting for molletons to dampen. It operates without alcohol, reduces paper waste and delivers incredibly sharp, bright color with less ink. The Altra features two oscillation nips to improve the milling of ink and water. This unique feature provides a smoother, more uniform film of water across the plate and the ability to run drier. Altra Series can be used with an existing recirculation system or the Waterboy Plus. The Altra gives the operator the flexibility of adjusting the moisture, while running, to meet each job's specific needs. Altra dampeners have no end seals to wear out or replace. Color changes and end of the day cleanup are automatic because the dampener cleans up with the ink train. The Altra Series retains all the existing ink rollers for maximum inking power & efficiency.

Installation can be done quickly without altering the press. Typically, a four color press can be converted in under two days and one or two color presses can be converted and printing the same day.

- Instant ink & water balance – no more waiting for molletons to get damp before printing
- Runs without alcohol – Altra's unique design provides a thinner film of moisture to the plate
- Paper waste – since color is achieved in only a few sheets, paper waste is decreased significantly
- "Double-nip" oscillation – the oscillator is located between the form and intermediate rollers for improved milling of ink & water
- Removable form roller – Altra uses the existing water form position for easier maintenance
- Installs without changing the ink train configuration
- Adaptable to any circulator

### Available for:

A.B. Dick 375, 8800 series, 8900, 9810-9850, 9870, 9900, 9985, 9995

AM Multi Graphics 1250, 1360, 1450, 1650, 1850, 1860

Hamada C248, C252, E47, E475, SU47, 500 CDA, 600, 665, 700, 775

Heidelberg GTO46, GTO52

Itek 3985, 950, 960, 975, 985

Ryobi 3302M, 3302H, 3304H, 2700, 2800, 3200, 3200E, 3200MCD, 500N

Townsend T-51 Stationary & swing away (anniversary edition), AB Dick 9800, 8800, Ryobi 2800, 3200

Altra Series dampeners are covered by a money back guarantee and Pamarco's outstanding warranty of one (1) year on rollers and two (2) years on all other parts. Altra Series dampeners are supported nationwide by an extensive dealer network and Pamarco's own staff of technical sales representatives. Product specifications and model availability subject to change without notice.

## Crestline® Continuous Feed Dampener

The Crestline® continuous feed dampener is designed to provide an uninterrupted flow of fountain solution to the plate, delivering instant ink and water balance. Color is achieved in only a few sheets. The Crestline runs without alcohol for minimal maintenance and does not allow moisture to migrate back into the ink fountain.

Crestline dampeners are easy to use and include single lever control, gear driven operation, ball bearing construction and an easily removable water tray.

Installation can be done in just a few hours, without altering the press, and any operator can be trained to use the Crestline Dampener in less than an hour. The benefits of increased productivity and profits start the same day the dampener is installed.

- Segregated from the ink train - no more moisture migrating back into the ink fountain
- Instant ink & water balance - Crestline responds instantly to changes needed in ink & water balance
- Runs without alcohol - Crestline provides a thinner film of moisture without the use of alcohol
- Reduced paper waste - Since color is achieved in only a few sheets, paper waste is decreased significantly
- Sharper, brighter color with less ink
- No end seals to leak, wear out or replace
- Installs without changing the ink train configuration, allowing for maximum inking power

### Available for:

**A.B. Dick:** 375, 8800 series, 8900, 9810-9850, 9870, 9900

**A.M. Multigraphics:** 1250, 1360, 1450, 1650, 1850, 1860, 1960

**Hamada:** E47, E47S, SU47, 500CDA, 600,665, 700, 775

**Itek:** 950, 960, 975, 985

**Ryobi:** 2700, 2800, 3200, 3200E, 3200MCD, 500N

**Townsend:** T-51(Stationary & Swing away),A.B. Dick 9800(Anniversary Edition),8800, 9800
